A BIG THANK YOU to Andi, Darla and Vicky for this past Wednesday (6/18) loft cleanup. The risers as we knew them are no more. When the organ is retrofitted, moved to its new location and the risers are installed we may need "spit & polish" volunteers to finish off our new redesigned loft.

If you have not picked up your directory you may stop by the parish office during regular hours.

ADA Update: As of 6/23 we have received contributions and pledges in the amount of \$33,561.00 (94%) toward our goal of \$35,584 from 163 families (38%). You have narrowed our shortage to \$2,023. This is doable. We would like to wrap this up in the next couple of weeks.

Last year Fr. Sauppé wrote an article about the closing of St. Mary's School and the current culture wars that are depopulating the Catholic Church. Here is the link to the article. Please pass this on to your friends. Thank you.

NURSE'S CORNER:

Summer picnics and family outings usually contain food and snacks. Food related choking send an average of 34 children a day to the emergency room for treatment. Many of the foods that children eat regularly and enjoy, from fruits and vegetables to hot dogs and candy, have long been known to pose a hazard and sometimes be fatal. Studies show the risk is common. Kids younger than 4 are most often endangered, and hard candy causes the most non-fatal choking episodes (16%) followed by other types of candy (13%), meat other than hot dogs (12%), bones (12%) and fruits and vegetables (10%). Other high risk foods such as hot dogs, which can totally block the airway of a small child or seeds and nuts, which can be difficult to chew, are more likely to lead to hospitalization. In 10% of the cases the children had to be hospitalized and taken to the operating room for a bronchoscopy to have the food removed. Grapes are another very dangerous food if swallowed whole.

Choking on food is preventable. Make safe and appropriate food choices.

- Cut food in very small pieces esp. for children 4 and younger.
- Ensure kids are supervised and stay seated while eating and not to be up and running with food in their mouth.
- Teach children to chew food thoroughly before swallowing. Manufacturers need to put warning labels on high risk foods such as those on toys that are a choking hazard.

The above precautions should be taken with adults who have difficulty swallowing, lack of teeth (unable to chew thoroughly) or poor fitting dentures or those who have had a stroke or other medical condition that may make them at Danger, such as Alzheimer's. Please practice caution.

Blood Pressures next weekend.

What a great day!!

Our Corpus Christi Procession and Parish Picnic was well attended. Congratulations to Ruth Karuzis, our 50/50 raffle winner of \$467.50. Winners of the Balent Estate items were Alyce Schifo, Alan Mitchell, Rick Baity and Sharon Wolfe. The weather couldn't have been any better if we had special ordered it and the food was delicious. Everyone seemed to have a good time. Two members of the Totus Tuus team joined us along with Seminarian Clinton Coulter. Thank you to the Knights of Columbus, those who carried the canopy, the Altar Servers, the young bell ringers, the dedicated cooks and the Altar & Rosary ladies for stepping up to help. We appreciate each and every one of you. Looking forward to next year.
